The Redress

- In this part of our presentation we need to demonstrate the justification of what we want as part of our settlement. Doug Graham has advised us that he does not want us to go into specific detail as it may unrealistically raise the expectations of the Whakatohea people.
- Our presentations need to be based around what we intend making as our opening position for our settlement but in a general sort of way. Again our objective should be to justify the righteousness of our position to Pakeha New Zealand, as at the end of the day they are the ones Doug Graham has to convince.
